

# myGPcommunity GP registrar portfolio

myGPcommunity

The logo for myGPcommunity features the text 'myGPcommunity' in a blue and orange font, with a stylized orange and blue figure at the end of the word 'community'.

# What is the new GP registrar portfolio on myGPcommunity?

NTGPE developed a new 'GP registrar portfolio' function on myGPcommunity to increase the educational engagement between GP registrars, GP supervisors and NTGPE under an assessment for learning framework.

# What's changed?

Currently supervisors can only access the following information on GP registrars through myGPcommunity:

- GP registrar quiz results
- Term tasks – only the GP registrar submission, not the feedback they receive from the medical educators.

# What is included in the portfolio from 2018.2?

- **Learning plans**
- **ECTV cover letters and case notes**
  - ECTVs reports from 2018.1 are available
- **Supervisor to supervisor handover**
  - From 2018.2, supervisors will be encouraged to provide feedback to the next supervisor by answering the following three questions asked on the end of term feedback survey:
    1. *What are the strengths this registrar has demonstrated while working in this practice?*
    2. *What learning needs are still to be addressed with this registrar?*
    3. *Would you like the next supervisor to give you a call to talk about how to best help this registrar in their progress in training?*

**The feedback from these three questions will be available in the portfolio from the end of 2018.2.**

# What is **not** included in the portfolio?

- Confidential emails
- TA meeting reports
- Exam results
- Critical incidents/ patient details

# Who can see the Portfolio?

- GP registrar
- Current GP supervisors - GP supervisors can only access the portfolio during the GP registrars active placement with them
- All medical educators
- NTGPE administrator staff with access

The new myGPcommunity GP registrar portfolio will improve communication between NTGPE, GP registrars and supervisors and assist in the GP registrars training journey.
